MUHAMMAD JIBRAN KHAN

SOFTWARE ENGINEER | PYTHON & AI APPLICATION DEVELOPMENT

Pakistan | Email: jibranking000@gmail.com | Phone: 03700710175
GitHub: github.com/itzjb74 | Portfolio: itzjb74.github.io/jibranportfolio/

PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on project experience building Python-based APIs and AI/NLP applications. Developed PlagAware, a document similarity and clone-plagiarism detection application, and an AI Resume Analyzer that extracts resume information and compares it with job descriptions. Familiar with FastAPI, text preprocessing, PDF/document processing, API validation, testing, Git, and Flutter integration. Seeking an entry-level software engineering or Python/AI application development opportunity.

TECHNICAL SKILLS

Programming	Python, HTML, CSS, JavaScript
Backend & APIs	FastAPI, REST APIs, request validation, Pydantic
AI / NLP	Text preprocessing, stemming, keyword extraction, similarity scoring, resume/job-description matching
Data & Documents	Pandas, PDF/DOCX/TXT text extraction, file validation
Tools & Testing	Git, GitHub, VS Code, pytest, Swagger/OpenAPI
Frontend / Integration	Flutter, HTTP API integration, responsive web fundamentals

PROJECTS

PlagAware — Document Similarity & Clone Plagiarism Detector

Tech: Python, FastAPI, NLP preprocessing, PDF/DOCX/TXT extraction, Flutter, pytest

- Built an API-based workflow to upload documents and compare their textual similarity, including sentence-level match scores and a configurable similarity threshold.
- Implemented text extraction and preprocessing, upload validation, safe temporary-file handling, and cleanup after processing.
- Added automated tests covering the similarity endpoint, invalid thresholds, unsupported file types, file-size limits, and temporary-file deletion.
- Connected the backend to a Flutter interface and tested the application through local API/browser workflows.

AI Resume Analyzer — Resume & Job Description Matching

Tech: Python, FastAPI, PDF processing, NLP/keyword extraction, Flutter, Git/GitHub

- Developed a resume-analysis API that extracts resume content and identifies skills, education, experience, and relevant keywords.
- Implemented weighted matching against a job description and generated a match score with improvement recommendations.
- Added keyword normalization, PDF validation, API schema improvements, and end-to-end checks.
- Version-controlled the project with Git and published the source code to GitHub.

EDUCATION

Bachelor of Science (BS) in Software Engineering

Iqra National University, Peshawar | 2022–2026

TRAINING

Artificial Intelligence Course — NAVTTC

Training covered AI/ML foundations and topics including classification, support vector machines, neural networks, CNNs, recurrent neural networks, and sequence-model concepts.

ADDITIONAL

- Interested in backend development, practical AI/NLP applications, API engineering, and software testing.
- Portfolio: itzjb74.github.io/jibranportfolio/
